Yukon-Kuskokwim Health Corporation

Special Consent Forms for Operations or Other Procedures

Rev. 062615

Directions for use

The consent forms included in this document are the ONLY approved consent forms in use at YKHC.

The Blank Consent Form (page 2) may only be used for significant invasive procedures for which a specific consent does not already exist.

Minor procedures such as Incision & Drainage outside the OR, toenail removal outside the OR, and joint aspiration, do not require use of consent forms.

Using this Acrobat Document

This is a hyperlinked Acrobat document. Make sure your cursor is in the shape of a hand (hand tool). Move the cursor to the title of the consent you want to choose at the right. When the hand changes to a pointing finger, click and your screen will jump to that form. Note the page number, choose your print command and enter the appropriate page(s) in the pages to print option area. For best results set the page scaling to "none." Print the desired number of copies.

To return to this page from any other page in the document, click the YKHC logo at the top of the page.

For further information about YKHC's consent forms, please review the Policy included at the end of this document.

Patient Consent Form

PROCEDURE CONSENT

I hereby authorize ____

and such assistants as he/she may designate, to perform the following operation or procedure:

Technical Description	
Lay Description	

______________________ has discussed with me the information briefly summarized below:

Purpose	
Potential Risks (not necessarily all of them)	
Risks of not having the procedure	
Alternative Treatments	

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. I know that if I do not understand what my doctor has told me, if I have special concerns or want more detailed information, I should ask more questions and get more information before signing this consent agreeing to the procedure/operation.

Clinical students may observe: ☐ Yes ☐ No

If patient is incompetent or a minor, complete the following:
Patient is unable to give consent because:

____

____

PATIENT INFORMATION

Name: ______________________________________

DOB: ________________ Med Rec #: ________________

DOS: ________________ Encounter: ________________

Residence: __________________________________

Facility: ____________________________________

I consent to the procedure/operation and sign this of my own free will.

Incision and Drainage of Abscess in the OR Consent

PROCEDURE CONSENT

I hereby authorize ______________________________ and such assistants as he/she may designate, to perform the following operation or procedure: (Provider Name)

Technical Description	• Incision and Drainage of Abscess in the OR
Lay Description	• Cut open and drain the pus out of the boil in the OR

______________________________ has discussed with me the information briefly summarized below:

Purpose	• Open infected area so it can drain and heal
Potential Risks (not necessarily all of them)	• Pain • bleeding • possible worsening of infection • scar formation
Risks of not having the procedure	• Worsening of infection
Alternative Treatments	• Hot packs and antibiotics

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. I know that if I do not understand what my doctor has told me, if I have special concerns or want more detailed information, I should ask more questions and get more information before signing this consent agreeing to the procedure/operation.

Clinical students may observe: ☐ Yes ☐ No

If patient is incompetent or a minor, complete the following:
Patient is unable to give consent because:

Bilateral Myringotomy with Tubes Consent

PROCEDURE CONSENT

I hereby authorize ____
and such assistants as he/she may designate, to perform the following operation or procedure:

Technical Description	• ☐ Right ☐ Left ☐ Bilateral Myringotomy with Insertion of Vented Tubes
Lay Description	• Insert Tubes into the ears

____________________________ has discussed with me the information briefly summarized below:

Purpose	• To drain fluid from the ears to prevent ear infections and hearing loss.
Potential Risks (not necessarily all of them)	• Bleeding, Infection
Risks of not having the procedure	• Unresolved hearing loss / Draining ears
Alternative Treatments	

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. I know that if I do not understand what my doctor has told me, if I have special concerns or want more detailed information, I should ask more questions and get more information before signing this consent agreeing to the procedure/operation.

Clinical students may observe: ☐ Yes ☐ No

If patient is incompetent or a minor, complete the following:
Patient is unable to give consent because:

Cesearean Section Consent

PROCEDURE CONSENT

I hereby authorize ____

and such assistants as he/she may designate, to perform the following operation or procedure:

Technical Description	• ☐ Primary ☐ Repeat Cesearean Section
Lay Description	• Make an incision in the abdomen and womb to allow surgical delivery of the baby

__________________________ has discussed with me the information briefly summarized below:

Purpose	• To maximize the safety of the delivery for the baby and the mother.
Potential Risks (not necessarily all of them)	• Pain • Bleeding possibly requiring a blood transfusion • Infection • Perforation of an internal organ which may require transfer to Anchorage for surgery • Cesearian Hysterectomy • A laceration to the baby • In very rare cases death to the baby or mother.
Risks of not having the procedure	• Increased risk of fetal injury or death. (If you had a previous C-Section, there is an increased risk of uterine rupture with vaginal delivery.)
Alternative Treatments	

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. I know that if I do not understand what my doctor has told me, if I have special concerns or want more detailed information, I should ask more questions and get more information before signing this consent agreeing to the procedure/operation.

Clinical students may observe: ☐ Yes ☐ No

If patient is incompetent or a minor, complete the following:
Patient is unable to give consent because:

Circumcision Consent

PROCEDURE CONSENT

I hereby authorize ____
and such assistants as he/she may designate, to perform the following operation or procedure:

Technical Description	• Circumcision
Lay Description	• Removal of the tip of the skin covering the penis

__________________________ has discussed with me the information briefly summarized below:

Purpose	• For cosmetic reasons • Decreased risk of urinary tract infections, sexually transmitted infections, and penile cancer.
Potential Risks (not necessarily all of them)	• Bleeding that may require sutures • Infection, bruising, swelling, injury to the penis, and—*extremely rarely*—death. • Undesired cosmetic result requiring revision or additional surgery • Risk for decreased sensation of the penis later in life.
Risks of not having the procedure	• Small risk of urinary tract infections, sexually transmitted infections, and penile cancer.
Alternative Treatments	

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. I know that if I do not understand what my doctor has told me, if I have special concerns or want more detailed information, I should ask more questions and get more information before signing this consent agreeing to the procedure/operation.

Clinical students may observe: ☐ Yes ☐ No

If patient is incompetent or a minor, complete the following:
Patient is unable to give consent because:

____

Colonoscopy Consent

PROCEDURE CONSENT

I hereby authorize ____
and such assistants as he/she may designate, to perform the following operation or procedure:

Technical Description	• Colonoscopy with possible biopsy or polyp removal • Procedural sedation • Picture taking for medical documentation
Lay Description	• Look in the large intestine with a flexible camera and possibly take pieces of tissue and remove growths. • Give medications to make you sleepy and more comfortable during the procedure.

___________________________ has discussed with me the information briefly summarized below:

Purpose	• To examine your large intestine for cancer, polyps (growths), bleeding, and infection.
Potential Risks (not necessarily all of them)	• Drug reaction including allergic reaction, low blood pressure, difficulty breathing, and death. • Bleeding which can occur immediately or even weeks after the procedure. • Perforation (causing a hole in the intestine) which can occur immediately or be delayed. • Missing a polyp or cancer. • Inability to complete the procedure requiring additional testing (such as a barium enema). • If a complication occurs, you might need a blood transfusion, you might need to be hospitalized or medevacced to Anchorage for surgery, and you could possibly die.
Risks of not having the procedure	• Undetected polyps or cancer resulting in delayed treatment
Alternative Treatments	• Barium enema (an X-ray of the large intestine) • No sedation

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. I know that if I do not understand what my doctor has told me, if I have special concerns or want more detailed information, I should ask more questions and get more information before signing this consent agreeing to the procedure/operation.

Clinical students may observe: ☐ Yes ☐ No

If patient is incompetent or a minor, complete the following:
Patient is unable to give consent because:

Colposcopy Consent

PROCEDURE CONSENT

I hereby authorize ____
and such assistants as he/she may designate, to perform the following operation or procedure:

Technical Description	• Colposcopy with Cervical Biopsy and Endocervical Curretage
Lay Description	• Looking for abnormal cells on the opening of my cervix or womb that could turn into precancer or cancer

__________________________ has discussed with me the information briefly summarized below:

Purpose	• Looking at the cervix with a magnifying lens and taking a small piece or scraping of any abnormal tissue for further examination looking precancer or cancer
Potential Risks (not necessarily all of them)	• Bleeding, Infection • Missing an abnormal area that exists. • Vaginal discharge.
Risks of not having the procedure	• Failure to diagnose a pre-cancer or cancer that requires treatment.
Alternative Treatments	• Observation without treatment

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. I know that if I do not understand what my doctor has told me, if I have special concerns or want more detailed information, I should ask more questions and get more information before signing this consent agreeing to the procedure/operation.

Clinical students may observe: ☐ Yes ☐ No

If patient is incompetent or a minor, complete the following:
Patient is unable to give consent because:

Cystoscopy Consent

PROCEDURE CONSENT

I hereby authorize ____

and such assistants as he/she may designate, to perform the following operation or procedure:

Technical Description	• ☐ Flexible ☐ Rigid Cystoscopy
Lay Description	• Look into the bladder with a lighted scope

__________________________ has discussed with me the information briefly summarized below:

Purpose	• Rule out bladder tumors or obstruction to urinary flow
Potential Risks (not necessarily all of them)	• Bleeding and infection
Risks of not having the procedure	
Alternative Treatments	• Do nothing

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. I know that if I do not understand what my doctor has told me, if I have special concerns or want more detailed information, I should ask more questions and get more information before signing this consent agreeing to the procedure/operation.

Dental Rehabilitation Consent

PROCEDURE CONSENT

I hereby authorize ____
and such assistants as he/she may designate, to perform the following operation or procedure:

Technical Description	• Complete Dental Rehabilitation in the Operating Room under General Anesthesia • Operative and surgical repair of all dental lesions and disease including, but not limited to: head and neck exam, dental x-rays, extraction(s) of erupted and unerupted teeth, biopsies, removal of tooth decay, dental restorations, endodontic treatments, dental sealants, dental prophylaxis, fluoride application, local anesthesia, photographs for medical documentation.
Lay Description	• Dental treatment while the patient is asleep, including, but not limited to: dental exam, dental x-rays, extractions, biopsies, tooth-colored and silver fillings, tooth nerve treatments, silver crowns, sealants, cleaning and fluoride, photos for medical documentation.

___________________________ has discussed with me the information briefly summarized below:

Purpose	• To improve the oral health of the patient.
Potential Risks (not necessarily all of them)	• Allergic reaction • Swelling, pain, infection, fever, vomiting • Damage to developing permanent teeth especially when extracting unerupted teeth • Dental space loss.
Risks of not having the procedure	• Progression of the existing dental disease and/or infection • Infection, pain, swelling, fever • Difficulty eating and/or sleeping • Damage or disruption of developing permanent teeth.
Alternative Treatments	• Two or more difficult dental appointments with or without restraints and/or light sedation.

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. I know that if I do not understand what my doctor has told me, if I have special concerns or want more detailed information, I should ask more questions and get more information before signing this consent agreeing to the procedure/operation.

Dilation and Curettage Consent

PROCEDURE CONSENT

I hereby authorize ____
and such assistants as he/she may designate, to perform the following operation or procedure:

Technical Description	• Dilation and Curettage
Lay Description	• Dilate cervix and empty contents of uterus with suction and scraping out uterus

_____________________________ has discussed with me the information briefly summarized below:

Purpose	• Remove non-living pregnancy to prevent infection and bleeding
Potential Risks (not necessarily all of them)	• Infection • Heavy bleeding requiring blood transfusion • Perforate uterus
Risks of not having the procedure	• Infection, Bleeding
Alternative Treatments	• Waiting for uterus to pass pregnancy on its own

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. I know that if I do not understand what my doctor has told me, if I have special concerns or want more detailed information, I should ask more questions and get more information before signing this consent agreeing to the procedure/operation.

Esophagastroduodenoscopy (EGD) Consent

PROCEDURE CONSENT

I hereby authorize ____
and such assistants as he/she may designate, to perform the following operation or procedure:

Technical Description	• EGD (esophagogastroduodenoscopy) with possible biopsy and/or polyp removal and possible therapeutic injection • Procedural sedation • Picture taking for medical documentation
Lay Description	• Look in the esophagus, stomach and duodenum with a flexible camera. • Take pieces of tissue, remove growths, and inject medicine if needed to stop bleeding. • Give medications to make you sleepy and more comfortable during the procedure.

__________________________ has discussed with me the information briefly summarized below:

Purpose	• To examine your esophagus, stomach and duodenum for cancer, polyps (growths), ulcers, bleeding, and infection.
Potential Risks (not necessarily all of them)	• Drug reaction including allergic reaction, low blood pressure, difficulty breathing, and death. • - Bleeding which can occur immediately or later after you are discharged. • Perforation (causing a hole in the esophagus, stomach, and/or duodenum). • Missing an ulcer, growth or cancer. • Inability to complete the procedure requiring additional testing (such as a barium swallow). • If a complication occurs, you might need a blood transfusion, you might need to be hospitalized or medevaced to Anchorage for surgery, and you could possibly die.
Risks of not having the procedure	• Undetected bleeding, ulcers, infection, and cancer resulting in delayed treatment.
Alternative Treatments	• Barium swallow (an X-ray of the esophagus, stomach and duodenum) • No sedation • Medical treatment without endoscopy

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. I know that if I do not understand what my doctor has told me, if I have special concerns or want more detailed information, I should ask more questions and get more information before signing this consent agreeing to the procedure/operation.

Endometrial Biopsy Consent

PROCEDURE CONSENT

I hereby authorize ____
and such assistants as he/she may designate, to perform the following operation or procedure:

Technical Description	• Endometrial Biopsy
Lay Description	• Put a small tube in my uterus or womb to scrape or suction the lining

____________________ has discussed with me the information briefly summarized below:

Purpose	• To collect uterine tissue to help determine the cause of my irregular bleeding.
Potential Risks (not necessarily all of them)	• Discomfort, bleeding, infection • Injury to the womb • Potentially missing an abnormal site.
Risks of not having the procedure	• Missing cancer or precancerous abnormalities of the endometrium
Alternative Treatments	• Observation without treatment • Dilatation & Curettage.

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. I know that if I do not understand what my doctor has told me, if I have special concerns or want more detailed information, I should ask more questions and get more information before signing this consent agreeing to the procedure/operation.

Essure Procedure Consent

PROCEDURE CONSENT

I hereby authorize ___________________________________
and such assistants as he/she may designate, to perform the following operation or procedure:

Technical Description	• Place Essure inserts in fallopian tubes using a hysteroscope
Lay Description	• Place small spring-like devices in tubes using a lighted scope. • Essure is permanent and CANNOT be reversed. • You MUST have a confirmation test in 3 months to confirm tube blockage. • You MUST use birth control until the confirmation test is done.

_________________________ has discussed with me the information briefly summarized below:

Purpose	• Prevent pregnancy
Potential Risks (not necessarily all of them)	• Pregnancy, no birth control is 100%. This Is 99.8% with a confirmation test. • Bleeding, infection, damage to the uterus, allergic reaction or cramping. • Failure to place the inserts.
Risks of not having the procedure	• Pregnancy
Alternative Treatments	• Tubal ligation through abdominal surgery

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. I know that if I do not understand what my doctor has told me, if I have special concerns or want more detailed information, I should ask more questions and get more information before signing this consent agreeing to the procedure/operation.

Excisional Biopsy Consent

PROCEDURE CONSENT

I hereby authorize ____

and such assistants as he/she may designate, to perform the following operation or procedure:

Technical Description	• Excisional Biopsy
Lay Description	• To remove a skin abnormality and/or part of a skin abnormality

__________________________ has discussed with me the information briefly summarized below:

Purpose	• To remove abnormal growths and/or test tissue for diagnostic purposes
Potential Risks (not necessarily all of them)	• Infection, scarring, • Failure to remove lesion entirely, and re-growth of lesion • Reaction to local anesthetic • Need for wider excision.
Risks of not having the procedure	• Undiagnosed cancer or other tissue abnormalities.
Alternative Treatments	• No Biospy and observation.

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. I know that if I do not understand what my doctor has told me, if I have special concerns or want more detailed information, I should ask more questions and get more information before signing this consent agreeing to the procedure/operation.

Clinical students may observe: ☐ Yes ☐ No

If patient is incompetent or a minor, complete the following:

Exercise Stress Test Consent

PROCEDURE CONSENT

I hereby authorize ____

and such assistants as he/she may designate, to perform the following operation or procedure:

Technical Description	• Exercise Stress Test
Lay Description	• To monitor and to evaluate the ability of your heart to respond to exercise.

__________________________ has discussed with me the information briefly summarized below:

Purpose	• To evaluate the ability of your heart to respond to exercise.
Potential Risks (not necessarily all of them)	• In rare cases, such symptoms as abnormal heart rhythms, fainting, heart attacks, and in extremely rare cases, death.
Risks of not having the procedure	• Undiagnosed heart disease with increased risk of death.
Alternative Treatments	

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. I know that if I do not understand what my doctor has told me, if I have special concerns or want more detailed information, I should ask more questions and get more information before signing this consent agreeing to the procedure/operation.

Clinical students may observe: ☐ Yes ☐ No

If patient is incompetent or a minor, complete the following:
Patient is unable to give consent because:

External Cephalic Version Consent

PROCEDURE CONSENT

I hereby authorize ____
and such assistants as he/she may designate, to perform the following operation or procedure:

Technical Description	• External Cephalic Version
Lay Description	• Attempt to turn the baby until its head is down by pushing on your abdomen.

__________________________ has discussed with me the information briefly summarized below:

Purpose	• To move the baby into a position which allows a safe vaginal delivery.
Potential Risks (not necessarily all of them)	• Changes in the baby's heart rate which resolve shortly after finishing the procedure • Rupture of the bag of waters and starting labor. • *Very rarely*, severe changes in the baby's heart rate and/or separation of the placenta from the uterus, necessitating an emergency cesarean section.
Risks of not having the procedure	• Cesarean section is the recommended route of delivery for babies that are breech, to prevent serious complications of vaginal delivery such as spinal cord injury.
Alternative Treatments	• Elective cesarean section • Breech vaginal delivery

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. I know that if I do not understand what my doctor has told me, if I have special concerns or want more detailed information, I should ask more questions and get more information before signing this consent agreeing to the procedure/operation.

Flexible Sigmoidoscopy Consent

PROCEDURE CONSENT

I hereby authorize ____
and such assistants as he/she may designate, to perform the following operation or procedure:

Technical Description	• Flexible Sigmoidoscopy with Biopsy with Conscious Sedation • Take pictures for medical documentataion
Lay Description	• Look into rectum and large intestine with a telescope to look for bleeding and cancer • Take pieces of tissue if they look suspicious. • Give you medicine to make your sleepy.

__________________________ has discussed with me the information briefly summarized below:

Purpose	• To look for cancer and/or bleeding
Potential Risks (not necessarily all of them)	• Bleeding or perforation of colon possibly requiring blood transfusion, transfer to Anchorage for surgery and possibly resulting in death • Possible drug reaction, and/or respiratory arrest. • There is also a risk of missing polyps or cancer
Risks of not having the procedure	• Undetected cancer
Alternative Treatments	• Colonoscopy • Barium Enema

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. I know that if I do not understand what my doctor has told me, if I have special concerns or want more detailed information, I should ask more questions and get more information before signing this consent agreeing to the procedure/operation.

Placement of IUD Consent

PROCEDURE CONSENT

I hereby authorize ____
and such assistants as he/she may designate, to perform the following operation or procedure:

Technical Description	• Placement of IUD
Lay Description	• Put IUD in uterus to prevent pregnancy

____________________ has discussed with me the information briefly summarized below:

Purpose	• Prevent pregnancy
Potential Risks (not necessarily all of them)	• Risk of serious pelvic infection resulting in infertility and/or future risk of ectopic pregnancy. • Risk of painful periods and spotting between periods. • Risk of uterine perforation. • Risk of IUD coming out. • Risk of undesired pregnancy.
Risks of not having the procedure	• Undesired Pregnancy
Alternative Treatments	• All other forms of birth control.

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. I know that if I do not understand what my doctor has told me, if I have special concerns or want more detailed information, I should ask more questions and get more information before signing this consent agreeing to the procedure/operation.

Loop Electrical Excision Procedure Consent

PROCEDURE CONSENT

I hereby authorize ____
and such assistants as he/she may designate, to perform the following operation or procedure:

Technical Description	• LEEP (Loop Electrical Excision Procedure)
Lay Description	• Cut off a piece of the cervix using an electrical cautery device

__________________________ has discussed with me the information briefly summarized below:

Purpose	• Diagnosis of abnormal cervical/womb tissue which could turn into cancer or precancer
Potential Risks (not necessarily all of them)	• Risk of serious hemorrhage, infection • Damage to cervix leading to narrowing of the cervix, cervical incompetence and increased risk of preterm delivery • Failure to completely remove abnormal tissue • Risk of bowel or bladder injury • Reaction to local anesthesia • Need for potential blood transfusion if hemorrhage occurs.
Risks of not having the procedure	• Progression of abnormal tissue to cervical cancer.
Alternative Treatments	• Observation or referral for cone biopsy or cryotherapy.

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. I know that if I do not understand what my doctor has told me, if I have special concerns or want more detailed information, I should ask more questions and get more information before signing this consent agreeing to the procedure/operation.

Lumbar Puncture Consent

PROCEDURE CONSENT

I hereby authorize ____
and such assistants as he/she may designate, to perform the following operation or procedure:

Technical Description	• Lumbar Puncture (Spinal Tap)
Lay Description	• Placing a needle in the back to collect fluid that surrounds the spinal cord

__________________________ has discussed with me the information briefly summarized below:

Purpose	• To evaluate for infection or bleeding of the meninges, brain, and/or spinal cord
Potential Risks (not necessarily all of them)	• Bleeding, infection, bruising • Sensory motor damage of the lower extremities which include: numbness, weakness, paralysis • These sensory motor changes are rare and usually temporary.
Risks of not having the procedure	• Undiagnosed infection of the Meninges, brain and/or spinal cord resulting in brain damage or death
Alternative Treatments	• Treatment for presumed infection of the meninges, brain, and/or spinal cord which includes in hospital IV antibiotics.

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. Mesiodens Consent

PROCEDURE CONSENT

I hereby authorize ____
and such assistants as he/she may designate, to perform the following operation or procedure:

Technical Description	• Mesiodens or supernumerary tooth extraction(s).
Lay Description	• Surgical removal of extra teeth in the upper or lower jaw.

__________________________ has discussed with me the information briefly summarized below:

Purpose	• To remove extra teeth.
Potential Risks (not necessarily all of them)	• Allergic reaction, swelling, pain, infection, fever, vomiting • Damage or disruption of surrounding developing permanent teeth
Risks of not having the procedure	• Damage or disruption of surrounding developing permanent teeth • Eruption of teeth into the nasal sinuses • Formation of cysts or tumors • Poor alignment of permanent teeth • Impaction of permanent teeth • Eruption of extra teeth into the oral cavity • Interference with speech and other oral functions • Increased difficulty of surgery if you wait until a later date.
Alternative Treatments	• No treatment • Extraction • Postponing extraction until the surrounding permanent teeth have finished the formation of their roots • Radiographic monitoring at least every 5 years if extra teeth not removed.

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. I know that if I do not understand what my doctor has told me, if I have special concerns or want more detailed information, I should ask more questions and get more information before signing this consent agreeing to the procedure/operation.

Moderate / Procedural Sedation Consent

PROCEDURE CONSENT

I hereby authorize ____
and such assistants as he/she may designate, to perform the following operation or procedure:

Technical Description	• Moderate / Procedural Sedation in the operating room if necessary
Lay Description	• Give you medicine to make you sleepy and/or put you to sleep and help you breath in the operating room if necessary.

__________________________ has discussed with me the information briefly summarized below:

Purpose	• To minimize patient's anxiety and pain to allow performance of a procedure
Potential Risks (not necessarily all of them)	• Possible drug reaction • Respiratory arrest possibly requiring intubation • Hypotension • Pneumonia • Failure of sedation • In *extreme rare cases* death
Risks of not having the procedure	
Alternative Treatments	• No Sedation or General Anesthesia

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. I know that if I do not understand what my doctor has told me, if I have special concerns or want more detailed information, I should ask more questions and get more information before signing this consent agreeing to the procedure/operation.

IVP (Excretory Urogram) Consent

PROCEDURE CONSENT

I hereby authorize ____
and such assistants as he/she may designate, to perform the following operation or procedure:

Technical Description	• IVP (Excretory Urogram)
Lay Description	• Injection of a special dye (Contrast agent) in a vein to see the fluid collecting system of the kidneys and bladder.
Questions	Adverse reaction to previous contrast injection: ☐ Yes ☐ No Describe:____________________ Do you have allergies? ______________________________ Do you have a history of asthma as a child or as an adult? ☐ Yes ☐ No Are you currently taking any of the following? ☐ Metformin ☐ Metaglip ☐ Avandamet ☐ Glucophage ☐ Glucovance. (these medications need to be suspended 24 hours prior to intravenous injection of contrast agent.) Do you have a history of kidney disease? ☐ Yes ☐ No If yes, check BUN/Creatinine levels. Creatinin must be below 2.0

____________________________ has discussed with me the information briefly summarized below:

Purpose	• To look for abnormalities in the G.U. System (Kidney, ureters and bladder)
Potential Risks (not necessarily all of them)	• Allergic reaction varying degree. i.e. Itching, hives, tightness in the throat, difficulty breathing, renal shut-down, shock, and *very rarely* death
Risks of not having the procedure	• Miss a kidney tumor, cyst. or stone
Alternative Treatments	• Ultra Sound, CT — without contrast agent at referral site.

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. I know that if I do not understand what my doctor has told me, if I have special concerns or want more detailed information, I should ask more questions and get more information before signing this consent agreeing to the procedure/operation.

Outpatient Oral Surgery Consent

PROCEDURE CONSENT

I hereby authorize ____
and such assistants as he/she may designate, to perform the following operation or procedure:

Technical Description	• Outpatient Oral Surgery
Lay Description	• Outpatient Oral Surgery

__________________________ has discussed with me the information briefly summarized below:

Purpose	• ☐ Control of infection ☐ relief of pain ☐ preservation of bone ☐ relief of crowding/malalignment
Potential Risks (not necessarily all of them)	• Dry socket or incomplete healing of an extraction site • Bleeding and/or bruising that may be prolonged • Infection • Injury to nerves in or around the mouth that could be permanent • Decision to leave a small piece of root in the jaw when its removal would require extensive surgery and an increased risk of complications • Involvement of sinus near tooth structures • Injury to nearby teeth or fillings • Restriction of mouth opening • Unusual reaction to medications given or prescribed. • You can expect bleeding, swelling, and/or pain following this procedure.
Risks of not having the procedure	• Pain, infection • Cyst or tumor formation • Loss of bone around the teeth causing their loss • Increased risk of complications if surgery is postoponed to a later date.
Alternative Treatments	• No treatment, restorative, root canal treatement, referral to a specialist

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. I know that if I do not understand what my doctor has told me, if I have special concerns or want more detailed information, I should ask more questions and get more information before signing this consent agreeing to the procedure/operation.

Clinical students may observe: ☐ Yes ☐ No

If patient is incompetent or a minor, complete the following:

Implanon Consent Form

PROCEDURE CONSENT

I hereby authorize ____
and such assistants as he/she may designate, to perform the following operation or procedure:

Technical Description	• Implanon Insertion
Lay Description	• Place a small rod in your LEFT arm for birth control.

__________________________ has discussed with me the information briefly summarized below:

Purpose	• Prevent pregnancy and periods
Potential Risks (not necessarily all of them)	• Scarring • Bleeding • Infection • May need extra tests to monitor rod.
Risks of not having the procedure	• Pregnancy, Heavy periods.
Alternative Treatments	• BCPs, IUD, Depo, Condoms, Etc.

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. Anesthesia Consent

My medical provider has explained to me that I will have an operation, diagnostic or treatment procedure. I understand the risks of the procedure and have been advised of alternative treatments and the expected outcome and what could happen if my condition remains untreated. I also understand that anesthesia services are needed so that my medical provider can perform the operation or procedure.

I understand that all forms of anesthesia involve some risks and no guarantees or promises can be made concerning the results of my procedure or treatment. Although rare, unexpected severe complications with anesthesia can occur and include the remote possibility of infection, bleeding, drug reactions, blood clots, loss of sensation, loss of limb function, paralysis, stroke, brain damage, heart attack or death.

I understand that these risks apply to all forms of anesthesia and that additional or specific risks have been explained to me by my anesthesia provider as they may apply to a specific type of anesthesia. I understand that the type(s) of anesthesia service used for my procedure is determined by many factors including my physical condition, the type of procedure my medical provider is to do, his or her preference, as well as my own desire.

It has been explained to me that sometimes an anesthesia technique which involves the use of local anesthetics, with or without sedation, may not succeed completely and therefore another technique may have to be used including general anesthesia.

I hereby consent to the following anesthesia service: ______________________________ and authorize that it be administered by______________________________or his/her associates, all of whom are credentialed to provide anesthesia services at this health facility. I also consent to an alternative type of anesthesia, if necessary, as deemed appropriate by them. I expressly desire the following considerations be observed (or write “none”)______________________________

I certify and acknowledge and accept that I understand the risks, alternatives and expected results of the anesthesia service and that I had ample time to ask questions and to consider my decision.

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. I know that if I do not understand what my doctor has told me, if I have special concerns or want more detailed information, I should ask more questions and get more information before signing this consent agreeing to the procedure/operation.

Diagnostic Hysteroscopy Consent

PROCEDURE CONSENT

I hereby authorize ____
and such assistants as he/she may designate, to perform the following operation or procedure:

Technical Description	• Diagnostic Hysteroscopy
Lay Description	• Place a lighted scope in uterus to look at the lining • Dilate cervix and empty contents of uterus, scraping out uterus and cervix

__________________________ has discussed with me the information briefly summarized below:

Purpose	• Find the cause of abnormal bleeding
Potential Risks (not necessarily all of them)	• Infection • Heavy bleeding requiring blood transfusion • Perforate uterus
Risks of not having the procedure	• Infection, bleeding
Alternative Treatments	• Medication • Hysterectomy

I have had an opportunity to discuss my condition, its treatment, and the proposed procedure/operation and to ask questions.
I am satisfied with the explanation I have been given and believe I have sufficient information to give this informed consent.

I accept that this informed consent does not spell out every possible risk or complication. YUKON-KUSKOKWIM HEALTH CORPORATION

Consent for Contrast Media

Your Physician, Dr. ____ has ordered an x-ray examination which may (or may not) involve the intravenous injection or oral administration of contrast material (dye) into the body. It is important that you are aware of possible side effects and complications involved. A partial list includes flushing, nausea, vomiting, itching, runny nose and eyes, and hives. More serious side effects occur less often, and these are pain and shock. Very, very rarely, death may occur.

1. Have you had any previous contrast injections? ☐ Yes ☐ No ☐ Unknown
2. If yes, for what kind of study? ☐ IVP ☐ CT ☐ Unknown
3. Any adverse reactions from the injection? ☐ Yes ☐ No

   If so, describe: ____
4. Any history of allergy? ☐ Yes ☐ No

   If yes, to what substances are you allergic? ________________________________

   ____
5. Any known allergy to Iodine? ☐ Yes ☐ No
6. Any history of asthma either as a child or an adult? ☐ Yes ☐ No
7. Any history of diabetes? ☐ Yes ☐ No
8. If yes, are you taking any medication for diabetes? ☐ Yes ☐ No

   If taking any derivative of Metformin, the patient needs to stop taking this medication for 48 hours after the CT exam and follow up with a provider.

8. Any previous history of heart desease (CHF, angina, cardiomyopathy)? ☐ Yes ☐ No
9. Any history of kidney disease, renal insufficiency or surgery to the kidneys? ☐ Yes ☐ No

---

Females only:

10. Are you pregnant or think that you may be pregnant? ☐ Yes ☐ No
11. Are you breastfeeding ☐ Yes ☐ No

For Technologist (to be performed prior to contrast administration)

☐ Check 2 patient identifiers ☐ Perform medicine reconciliation

☐ Perform time out

☐ First Dose Review performed by ______________________________ Title: ______________________________

☐ Creatinine level (0.6 to <1.3) (If indicated review Contrast Policy)

☐ Medication type and Dose

Double-checked by: (IV administration only)__________Administered by: ______________________________

Patient Consent for Treatment

POLICY: Patient Consent for Treatment	POLICY NUMBER: ADM_037_CL
CATEGORY: Administration	EFFECTIVE DATE: July, 2003
SECTION: Clinical	SUPERSEDES: New

I. POLICY:

A. General consent must be obtained from all adult patients with decision-making capacity, or person legally authorized to consent on behalf of the patient. However, informed consent must be obtained before the performance of a procedure, or the administration of a treatment, anesthesia, or blood or blood products, or the disposal of tissues or body parts. If consent is not obtained, the reasons must be documented in the patient's medical record.

B. All circumstances and questions cannot be anticipated before they arise, therefore this policy does not presume to address all possible situations concerning issues of patient consent. This document does not address consent for participation in clinical research or clinical trials that are governed by the Human Studies Committee. Consent for psychiatric treatment—voluntary and involuntary—will be obtained in accordance with the Alaska Mental Health Code. Legal Counsel, Compliance and the Risk Management Office are available to clarify information and answer questions.

II. PURPOSE:

The purpose of this policy is to provide guidelines and definitions of various consents, describe when consents are required, define who may sign the consent and to define what invasive procedures require a special consent.

III. DEFINITION:

A. Adult: A person 18 years of age or older or a person under 18 years of age who has the disabilities of minority removed.

B. Attending Provider: The physician with primary responsibility for a patient's treatment and care.

C. Decision-Making Capacity: The ability to understand and appreciate the nature and consequences of a decision regarding medical treatment and the ability to reach an informed decision in the matter.

D. Incapacitated: Lacking the ability, based on reasonable medical judgment, to understand and appreciate the nature and consequences of a treatment decision, including the significant benefits and harms of and reasonable alternatives to any proposed treatment decision.

E. Informed Consent: Consent for treatment/procedure from a competent patient or authorized person not acting under duress, fraud, or undue pressure; and, who is adequately informed by the healthcare worker of the following information concerning the contemplated procedure/treatment:

1. The patient's diagnosis.

2. The general nature of the contemplated procedure, its purpose, whether it is experimental, and the name(s) of the person(s) who will perform the procedure or administer or direct the treatment.

3. The benefits, risks, discomforts, and complications associated with the procedure, recuperation that may reasonably be expected, including all risks of the procedure or treatment, the likelihood of success.

4. The patient's prognosis if the procedure is not performed.

5. Reasonable alternative medical treatments, if any.

F. Expressed Consent: Either oral or written consent given by a competent person or authorized representative for incapacitated patient.

1. Oral consent – Consent conveyed through speech.

2. Written consent – Consent conveyed through written documentation. There are two types of Written Consent: (1) General Written Consent for Diagnosis and Treatment, and (2) Written Consent for Specific Medical and Surgical Procedures.

F. Implied Consent: Consent that may be inferred by the patient's behavior (e.g., a patient extending his arm for blood to be drawn). Implied consent is rarely documented and may be relied upon only for care or treatment that is routine and does not involve significant risk(s). Implied consent may not be relied on for HIV testing.

IV. PROCEDURE:

A. Who May Consent
1. To obtain consent for the treatment of an incapacitated adult patient the patient's legal guardian or properly appointed power of attorney, if one, may give consent for treatment on behalf of the patient.
2. Note: Family relationships (including spouse) do not, by themselves, make one person the legal agent of another.
3. When there is not an agent appointed in a medical power of attorney or guardian to consent on behalf of an adult patient who is comatose, incapacitated, or otherwise mentally or physically incapable of communication, an adult from the following list, who has decision-making capacity, is available after a reasonably diligent inquiry, and is willing to consent to medical treatment on behalf of the patient, in order of priority, may act as the "surrogate decision maker":
4. patient's spouse
5. an adult child of the patient who has the waiver and consent of all other qualified adult children of the patient to act as the sole decision-maker;
6. a majority of the patient's reasonably available adult children;
7. patient's parent(s); or
8. the individual clearly identified to act for the patient (before the patient's incapacity), the patient's nearest living relative.

B. Surrogate Decision Maker
1. In order to consent on behalf of the incapacitated adult patient, the patient, the surrogate: may not, under any circumstance, consent to voluntary inpatient mental health services, or the appointment of another surrogate.
2. Any dispute to the voluntary right of a party to act as the patient's surrogate must be resolved by the court having probate jurisdiction. Any decision by a surrogate must be based on knowledge of what the patient would desire, if known.

C. Provider Documentation
1. The attending physician shall document
2. The patient's comatose state, incapacity, or other inability to communicate in the patient's medical record;
3. The proposed medical treatment;
4. The diligent efforts to contact or cause to be contacted persons eligible to serve as the patient's surrogate decision-makers; and
5. The date and time of consent if a surrogate decision maker consents to medical treatment on behalf of the patient, including the attending physician's signature.
6. If the consent is not made in person, the surrogate decision maker's consent shall be reduced to writing in patients medical record, signed by the hospital staff member receiving the consent, and countersigned in the patient's medical record or on an informed consent form by the surrogate decision-maker.

D. General Rules Regarding Consent
1. General written consent for diagnosis and routine hospital must be obtained upon each patient's admission to the hospital whether for a fixed or indefinite stay (e.g., an admission to the Emergency Department for 3 hours or longer or to Ambulatory Surgery for 1 day versus inpatient admission for an indefinite stay).
2. Significantly invasive procedures, surgical procedures, and procedures requiring moderate sedation, general anesthesia or spinal/epidural anesthesia require informed consent on standardized preprinted forms.
3. Minor procedures do not require preprinted standard written consent. Risks and benefits of any procedure will be discussed with patients. Documentation of discussion of such procedures in a note is encouraged.
4. Preprinted Informed consent forms will have risks and benefits of the procedure/surgery clearly defined.
5. MSEC will determine which procedures/surgeries require prewritten consents and will approve content of the consents. Requests for new consents will be forwarded to MSEC for consideration and approval if appropriate.
6. All approved consent forms will be reviewed and revised at least every three years and as needed. The revision date will be documented on the form.
7. Consents will be available to all staff on units and on line.

Standard reference: JCAHO (TX.)
